Summary

Java/J2EE Developer with 4.6+ years building, enhancing, and supporting enterprise applications across healthcare integrations and automotive products, including **n-tier Java EE/Hibernate systems** and services handling **50K+ daily requests**.

Delivery scope: Analyzes requirements and downstream impact, implements modular Core Java/Spring and REST/SOAP changes, writes unit and integration tests, supports Maven/Jenkins builds, and validates releases within delivery timelines.

Engineering approach: Separates UI, service, DAO, DTO, and database concerns; improves maintainability, diagnostics, and response time through documented migration paths, cross-layer debugging, and query optimization.

Working style: Coordinates requirement understanding and delivery risks with technical leads and cross-functional teams, follows code-review and release processes, documents reusable solutions, and mentors developers through features and defects.

Technical Skills

Java & Architecture: Core Java, Java 8/11, Java EE/J2EE, n-tier/multi-tier architecture, OOP, MVC, modular design, design patterns; Spring Boot (knowledge), Spring Framework/MVC.

Web & Persistence: REST Services, SOAP, JAX-WS, JSF, AJAX, HTTP, JSON, XML, Hibernate/HQL, JDBC/OJDBC; Angular and React/TypeScript (training/projects).

Databases & Platforms: Oracle, DB2, PostgreSQL (training/project), SQL queries and query optimization; IBM WebSphere, Oracle WebLogic.

Build, Quality & Process: JIRA, Git, GitLab CI/CD, Maven, Jenkins, IBM UrbanCode, JUnit/JUnit4, integration testing, SoapUI, Postman, Log4j2, code reviews, documentation, Agile/Scrum.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Core Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare integration services on IBM WebSphere, supporting **50K+ daily requests under a 99.99% availability SLA**.
- Analyzed service requirements and downstream impact across member/provider rules, Oracle data contracts, SOAP schemas, and synchronous REST dependencies before implementation and validation.
- Integrated Java services with Oracle through OJDBC, consuming established views and PL/SQL procedures while implementing service-layer business rules and SQL-backed workflows.
- Integrated REST dependencies into SOAP/SOA flows with explicit timeout and partial-failure handling, preserving expected XML/JSON response behavior across systems.
- **Led a project-wide Log4j2 migration**, owning the initial PoC, documenting dependencies, limitations, and repeatable implementation steps, and reviewing team changes with the technical lead.
- Integrated AOP-based monitoring that propagated correlation IDs and captured latency, success/failure, and request-volume telemetry across service calls.
- Wrote and executed JUnit tests, validated response and failure scenarios with SoapUI, and supported Maven/Jenkins/IBM UrbanCode builds, release documentation, smoke testing, and go/no-go or rollback recommendations.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and unit-tested a **Java EE/J2EE n-tier application** with JSF/AJAX, service, DAO, and DTO layers, Hibernate/HQL persistence, Oracle WebLogic, and DB2 for Mercedes/Daimler Vans workflows.
- Integrated a Python prediction service through asynchronous Java REST requests and callbacks, then applied deterministic option and package validation before recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** through set-based HQL/DB2 query processing while retaining authoritative business validation in Java.
- Diagnosed issues across Python-service output, Java logs, and DB2 data; supported JIRA, Maven/Jenkins/GitLab CI/CD, JUnit4, Git-based code reviews, and production defect resolution.
- Mentored junior developers through codebase walkthroughs, modular feature changes, debugging, coding standards, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for digital-wallet and fitness-club applications, implementing authentication, REST-style workflows, CRUD, balances, transactions, and profile features.

Selected Project

Interactive Portfolio System

github.com/preferablehuman/portfolio

- Built and deployed a recruiter-facing React/TypeScript application with searchable skill evidence, project case studies, persisted theming, deep-link fallback, and automated GitHub Actions/GitHub Pages delivery.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
