Summary

Java Backend Software Engineer with 4.6+ years building and supporting enterprise services across healthcare and automotive products, including integrations handling **50K+ daily requests at 99.99% SLA availability**.

Delivery scope: Carries Java/Spring backend changes through requirements, REST/SOAP and messaging integration, database work, automated testing, CI/CD release validation, and production support.

Engineering approach: Improves performance, reliability, and observability through explicit failure handling, correlation-based telemetry, structured logging, query tuning, and cross-system root-cause analysis.

Working style: Collaborates with engineering, QA, database, deployment, operations, vendor, and business-facing teams; contributes architecture discussions, documents reusable solutions, reviews code, and mentors developers.

Technical Skills

Programming & Backend: Java 8/11, Python integration/project development, Spring Boot/Framework/MVC, Java EE/J2EE, REST/SOAP APIs, JAX-WS, Microservices/SOA, Hibernate/HQL, JDBC/OJDBC, OOP.

Observability & Operations: Correlation-ID tracing, latency/success/failure/volume telemetry, Log4j2, Prometheus and CloudWatch (projects), production monitoring, incident investigation, root-cause analysis, performance tuning.

Cloud & Containers: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC; Docker and Terraform (projects); Kubernetes (knowledge/project exposure).

Data, Delivery & Fundamentals: SQL, Oracle, DB2, PostgreSQL; Maven, Jenkins, GitLab CI/CD, IBM UrbanCode, Git, JUnit/JUnit4, SoapUI, Postman; data structures and algorithms, concurrency fundamentals.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare integration services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated and maintained an AOP-based monitoring library that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** across services.
- **Led a project-wide Log4j2 migration**, owning the PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated service flows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, synchronous REST dependencies, and Oracle/OJDBC processing with explicit timeout and partial-failure handling.
- Troubleshoot production issues across Java services, WebSphere, messaging, database, and downstream boundaries; supported a memory/resource-retention investigation through code-path review, mitigation planning, and rolling-restart validation.
- Supported Maven/Jenkins/IBM UrbanCode delivery, JUnit/SoapUI testing, release documentation, smoke and business checks, and go/no-go or rollback recommendations with engineering, QA, deployment, and operations teams.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a **Java EE/J2EE, JSF, Hibernate/HQL** application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.
- Integrated an asynchronous Python prediction workflow with Java APIs and callbacks, then enforced deterministic option and package rules before recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10-20 seconds** through set-based HQL/DB2 processing while retaining authoritative business validation in Java.

- Diagnosed cross-system incidents across Python output, Java logs, and DB2 reference data; supported Postman verification, Jenkins/GitLab CI/CD, JUnit4, Git-based code reviews, and junior-developer mentoring.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for digital-wallet and fitness-club applications, implementing authentication, CRUD, balances, transactions, and profile workflows.

Selected Projects

AWS Automated Spark Pipeline

github.com/preferablehuman/AWS-automated-spark-pipeline

- Built a cloud-native, event-driven AWS pipeline where **S3 uploads trigger Lambda staging to EFS**, an ECS-hosted Docker/Spark workload processes micro-batches, and results persist to RDS PostgreSQL/JDBC.
- Provisioned VPC, IAM, S3 notifications, Lambda, EFS, ECS, RDS, security groups, and CloudWatch resources with **Terraform**; processed an **8GB+ dataset** and retained EFS checkpoints for restart recovery.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Dockerized application with a **Python/FastAPI model service**, MinIO artifact storage, Prometheus metrics, diagnostics, and a React/TypeScript client for T5/PEFT-LoRA summarization and classification.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
