Summary

Java Backend / Application Developer with 4.6+ years delivering enterprise healthcare and automotive systems where service reliability, data correctness, and operational continuity matter.

Delivery scope: Converts requirements into Java/Spring services, REST/SOAP integrations, database-backed business logic, automated tests, release validation, and production support across the SDLC.

Engineering approach: Traces behavior across application, API, messaging, and database boundaries to improve performance, resiliency, security controls, observability, and data integrity.

Working style: Owns changes with limited guidance, collaborates with engineering, QA, database, deployment, vendor, and business-facing teams, and strengthens delivery through documentation, code reviews, and mentoring.

Technical Skills

Java Backend: Java 8/11, Core Java, Spring Framework, Spring MVC, REST APIs, SOAP/JAX-WS, Java EE/J2EE, EJB, Hibernate/HQL, JDBC/OJDBC, SOA; Spring Boot and microservices architecture (knowledge).

Data/Integration: Oracle, DB2, PostgreSQL (project/training), SQL query optimization, PL/SQL procedure integration, JMS, Azure Service Bus, Azure Relay, Azure Functions, JSON, XML.

Cloud/Delivery: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC (project); Docker, Terraform, Jenkins, Maven, GitLab CI/CD, IBM UrbanCode Deploy, Git, GitHub Actions.

Quality/Operations: JUnit/JUnit4, integration testing, SoapUI, Postman, Log4j2, API security boundaries, service authorization, observability, performance tuning, root-cause analysis, production support, Agile/Scrum.

Additional: Python service integration; React/TypeScript (project), Angular (training), Spark/PySpark Structured Streaming (project).

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare payer services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated hybrid service flows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, plus synchronous downstream REST dependencies with explicit timeout and partial-failure handling.
- Integrated Java services with **Oracle through OJDBC**, consuming established views and PL/SQL procedures while applying service-layer member/provider rules and validating data propagation.
- Enforced service-level authorization using authenticated identity supplied through an enterprise API Gateway boundary, keeping gateway authentication ownership with the platform team.
- **Led a project-wide Log4j2 migration**, owning the initial PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated AOP-based monitoring that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** for operational diagnosis.
- Supported root-cause analysis of a **WebSphere memory/resource-retention incident**, contributing code-path review, mitigation strategy, and rolling-restart validation while maintaining service availability.
- Coordinated requirement clarification, change documentation, JUnit/SoapUI testing, Jenkins/Maven/IBM UrbanCode release workflows, post-release checks, and go/no-go/rollback recommendations with cross-functional teams.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a Java EE/J2EE, JSF, Hibernate/HQL enterprise application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.

- Integrated a Python vehicle-configuration prediction service through asynchronous Java REST requests and callbacks, then enforced authoritative option/package rules before recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable option-code mapping from Java into set-based HQL/DB2 CASE expressions while retaining business validation in Java.
- Diagnosed issues across Python output, Java validation logs, API behavior, and DB2 reference data; used Postman and production logs to isolate defects and verify durable fixes.
- Supported Jenkins/GitLab CI/CD, Git-based code reviews, JUnit4 testing, Agile delivery, technical documentation, and production troubleshooting; **mentored junior developers** through codebase walkthroughs and reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet training applications, implementing authentication, email/OTP login, CRUD, balances, transactions, and profile workflows.

Projects

AWS Automated Spark Pipeline / NYU Taxi Platform

GitHub

- Built an **event-driven AWS data pipeline**: S3 uploads trigger Lambda staging to EFS, a Docker-packaged Spark Structured Streaming workload processes micro-batches on ECS, and transformed data persists to RDS PostgreSQL through JDBC.
- Provisioned VPC/subnets/NAT, IAM, S3 notifications, Lambda, EFS, ECS, RDS, security groups, and CloudWatch with Terraform; processed an **8GB+ dataset** and persisted EFS checkpoints for restart recovery.

Interactive Portfolio System

GitHub

- Built and deployed a React, Vite, TypeScript, and Tailwind CSS SPA with searchable project evidence, custom routing, deep-link fallback, persisted theming, and automated GitHub Actions/GitHub Pages delivery.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Dockerized **Python/FastAPI model service** for email summarization and classification using PyTorch, Hugging Face Transformers, T5, and PEFT/LoRA, with MinIO artifacts, Prometheus diagnostics, and a React/TypeScript client.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
