Summary

Java Backend Developer with cloud and AI-assisted engineering breadth and 4+ years delivering reliable enterprise healthcare and automotive services, complemented by AWS, applied-AI, and developer-tooling projects.

Delivery scope: Carries changes from requirement clarification and technical design through Java/Spring implementation, API and database integration, testing, code review, documentation, release validation, and maintenance.

Engineering approach: Improves service quality through stable contracts, performance tuning, observability, security boundaries, and repeatable automation; validates AI-assisted changes through builds, tests, execution checks, and human review.

Working style: Operates as a self-starter within evolving cross-functional teams, communicates design trade-offs, learns unfamiliar systems quickly, documents reusable solutions, and mentors developers.

Technical Skills

Java Backend: Java 8/11, Core Java, Spring Framework, Spring MVC, REST/SOAP APIs, Java EE/J2EE, Hibernate/HQL, JDBC/OJDBC, SQL, data structures and algorithms (project); Spring Boot and microservices architecture (knowledge).

Cloud/Platform: Azure Service Bus, Azure Relay, Azure Functions, JMS, IBM WebSphere; AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC, Docker, Terraform (project).

AI-Assisted Engineering: Codex, GitHub Copilot, prompt engineering, human-in-the-loop review, AI-assisted code/debug/test/documentation workflows (projects); LangChain, Ollama, Qwen 2.5 Coder, RAG, Qdrant, local LLM integration.

Data/Delivery: Oracle, DB2, PostgreSQL (projects/training), Git, GitHub Actions, GitLab CI/CD, Jenkins, Maven, IBM UrbanCode Deploy; JUnit/JUnit4, integration testing, SoapUI, Postman, Log4j2, Agile/Scrum, production support; Kafka (project exposure).

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, Spring Framework/JAX-WS, and REST/SOAP** healthcare payer services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated hybrid-cloud workflows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, plus synchronous downstream REST dependencies with explicit timeout and partial-failure behavior.
- Integrated Java services with **Oracle through OJDBC**, consuming established views and PL/SQL procedures while applying member/provider rules and validating downstream data propagation.
- Worked behind an enterprise API Gateway security boundary, consuming authenticated caller identity and enforcing service-level authorization rules.
- **Led a project-wide Log4j2 migration**, owning the PoC, evaluating dependency and configuration choices, preserving production log contracts, documenting a reusable upgrade path, and reviewing team changes.
- Integrated AOP-based service monitoring that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** for operational diagnosis.
- Supported root-cause analysis of a **WebSphere memory/resource-retention incident**, contributing code-path review, mitigation strategy, and rolling-restart validation while maintaining service availability.
- Coordinated requirement clarification, implementation, JUnit/SoapUI testing, code review, documentation, Jenkins/Maven/IBM UrbanCode workflows, post-release checks, and go/no-go/rollback recommendations.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a Java EE/J2EE, JSF, Hibernate/HQL application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.
- Integrated a Python prediction service through asynchronous Java REST requests and callbacks, then enforced authoritative option/package rules before recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable option-code mapping into set-based HQL/DB2 expressions while retaining business validation in Java.
- Diagnosed issues across Python output, Java validation logs, API behavior, and DB2 reference data; used Postman and production logs to isolate defects and verify durable fixes.
- Supported Jenkins/GitLab CI/CD, Git code reviews, JUnit4 testing, Agile delivery, and documentation; **mentored junior developers** through walkthroughs, debugging, and reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL training applications with authentication, email/OTP login, CRUD, balances, transactions, and profile workflows.

Projects

AI-Assisted Resume Corpus and Portfolio Delivery

Portfolio

- Directed architecture and implementation iteration with **Codex and GitHub Copilot**; reviewed generated changes, debugged failures, and accepted work only after relevant validators, builds, automated tests, parse checks, and runtime verification.
- Applied prompt engineering to code, tests, technical documentation, and evidence-ranked content while retaining human ownership of scope, quality, security-sensitive inputs, and final decisions.

CodingHelper - AI Coding and DSA Platform

- Built a React/TypeScript and Python/FastAPI platform using LangChain, Ollama/Qwen 2.5 Coder, RAG, Qdrant, and PostgreSQL to generate and retrieve structured **Java/Python data-structures and algorithms solution ladders**.
- Implemented isolated Java/Python execution and human-in-the-loop repair, rejection, and promotion gates; generated implementations run against bounded asserting tests before display or reuse.

AWS Automated Spark Pipeline / NYU Taxi Platform

GitHub

- Built an **event-driven AWS pipeline**: S3 uploads trigger Lambda staging to EFS, a Docker-packaged Spark Structured Streaming workload processes micro-batches on ECS, and transformed data persists to RDS PostgreSQL over JDBC.
- Provisioned VPC/subnets/NAT, IAM, S3 notifications, Lambda, EFS, ECS, RDS, security groups, and CloudWatch with Terraform; processed an **8GB+ dataset** and persisted checkpoints for restart recovery.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
