Summary

Java Backend Developer with AI-enabled product breadth and 4+ years delivering reliable enterprise healthcare and automotive systems, complemented by hands-on AI, full-stack, and AWS projects.

Delivery scope: Converts requirements into Java/Spring services, REST/SOAP integrations, database-backed logic, tests, CI/CD release validation, documentation, and production support across the SDLC.

Engineering approach: Improves reliability, performance, observability, and automation across API, messaging, data, and cloud boundaries; directs and validates AI-assisted development through builds, tests, execution checks, and human review.

Working style: Collaborates across engineering, QA, architecture, database, deployment, vendor, and business-facing teams; communicates trade-offs, reviews code, documents repeatable solutions, and mentors developers.

Technical Skills

Backend/Full Stack: Java 8/11, Spring Framework, Spring MVC, REST/SOAP APIs, Java EE/J2EE, Hibernate/HQL, JDBC/OJDBC, SQL; Python/FastAPI and React/TypeScript (projects); Spring Boot and microservices architecture (knowledge).

AI-Assisted Engineering: Codex, GitHub Copilot, prompt engineering, human-in-the-loop review, AI-assisted code/debug/test/documentation workflows (projects); LangChain, Ollama, Qwen 2.5 Coder, RAG, Qdrant vector/NoSQL database, local LLM integration.

Cloud/Event-Driven: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC, Docker, Terraform (project); JMS, Azure Service Bus, Azure Relay, Azure Functions; Kafka (project exposure), Kubernetes (knowledge).

Data/Delivery: Oracle, DB2, PostgreSQL (projects/training), Git, GitHub Actions, GitLab CI/CD, Jenkins, Maven, IBM UrbanCode Deploy; JUnit/JUnit4, integration testing, SoapUI, Postman, Log4j2, Agile/Scrum, production support.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, Spring Framework/JAX-WS, and REST/SOAP** healthcare payer services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated hybrid service workflows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, plus synchronous downstream REST dependencies with explicit timeout and partial-failure behavior.
- Integrated Java services with **Oracle through OJDBC**, consuming established views and PL/SQL procedures while applying member/provider rules and validating downstream data propagation.
- Worked behind an enterprise API Gateway security boundary, consuming authenticated caller identity and enforcing service-level authorization rules.
- **Led a project-wide Log4j2 migration**, owning the PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated AOP-based monitoring that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** for operational diagnosis.
- Supported root-cause analysis of a **WebSphere memory/resource-retention incident**, contributing code-path review, mitigation strategy, and rolling-restart validation while maintaining service availability.
- Coordinated requirement clarification, JUnit/SoapUI testing, Jenkins/Maven/IBM UrbanCode workflows, documentation, post-release checks, and go/no-go/rollback recommendations with cross-functional teams.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a Java EE/J2EE, JSF, Hibernate/HQL application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.
- Integrated a Python vehicle-configuration prediction service through asynchronous Java REST requests and callbacks, then enforced authoritative option/package rules before recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable option-code mapping into set-based HQL/DB2 expressions while retaining business validation in Java.
- Diagnosed issues across Python output, Java validation logs, API behavior, and DB2 reference data; used Postman and production logs to isolate defects and verify durable fixes.
- Supported Jenkins/GitLab CI/CD, Git code reviews, JUnit4 testing, Agile delivery, and documentation; **mentored junior developers** through walkthroughs, debugging, and reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built full-stack Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet training applications, implementing authentication, email/OTP login, CRUD, balances, transactions, and profile workflows.

Projects

CodingHelper - AI Coding and Learning Platform

- Built a React/TypeScript and **Python/FastAPI** platform using LangChain, Ollama/Qwen 2.5 Coder, RAG, Qdrant, and PostgreSQL to generate and retrieve structured Java/Python solution ladders.
- Implemented isolated Java/Python execution and **human-in-the-loop repair, rejection, and promotion gates**; generated implementations run against bounded asserting tests before display or reuse.

AI-Assisted Resume Corpus and Portfolio Delivery

Portfolio

- Directed architecture and implementation iteration with **Codex and GitHub Copilot**, reviewed generated changes, debugged failures, and accepted work only after relevant validators, builds, automated tests, and runtime checks.

AWS Automated Spark Pipeline / NYU Taxi Platform

GitHub

- Built an **event-driven AWS pipeline**: S3 uploads trigger Lambda staging to EFS, a Docker-packaged Spark Structured Streaming workload processes micro-batches on ECS, and transformed data persists to RDS PostgreSQL over JDBC.
- Provisioned VPC/subnets/NAT, IAM, S3 notifications, Lambda, EFS, ECS, RDS, security groups, and CloudWatch with Terraform; processed an **8GB+ dataset** and persisted checkpoints for restart recovery.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
