989-906-2108

Mount Pleasant, MI, USA

Versatile Software Developer and Data Engineer with 4+ years of experience building scalable microservices, cloud platforms, and robust data pipelines across healthcare, automotive, and research domains. Proficient in Java, Python, Azure, and Tableau, with sharp command over ETL, data warehousing, and system optimization. Currently pursuing an MS in Computer Science at Central Michigan University with a focus on cloud computing and data engineering. Certified in Azure Fundamentals, Developer, and Data Engineering. Combines backend precision, data fluency, and a commitment to reliability at scale.

Work Experience

Software Developer

Aug 2022 - Jul 2024

NTT DATA | India

- Implemented solutions using Java 8, 11, Python, and SQL, leveraging Spring Boot, Azure Functions, REST API, SOAP API, Maven, JUnit, GIT and SVN for efficient software development process.
- Implemented CI/CD pipelines for automated builds and deployments of microservices to Azure Cloud and Oracle WebLogic.
- Leveraged Software Development best practices, including unit testing with JUnit and Maven dependency management, for efficient code delivery.
- Reduced issue resolution time by 20% through collaboration and streamlined processes, improving team efficiency and ensuring 99.99% SLA uptime.
- Integrated software lifecycle with SVN, BitBucket as version control, azure devops and built over Jenkins
- Migrated, documented for project wide applications to log4j 2.x adoption improving logging performance
- Successfully expedited an EDX platform upgrade by leveraging Java expertise in code reviews, JAR dependencies, documentation, and fault analysis, reducing project delivery time by 50%

Senior Analyst

Oct 2021 - Jul 2022

Capgemini | India

- Developed and deployed Java/EJB microservices on a Web Server for automotive clients, enhancing predictive vehicle configuration modelling.
- Optimized SQL queries and modernized legacy code, improving data processing performance by 90%, utilizing Agile Development methodologies.
- Implemented Continuous Integration and Continuous Deployment pipelines for faster releases and improved software quality.
- Achieved a 90% performance gain through database optimization and code refactoring, leveraging Agile Development and Continuous Integration/Continuous Deployment practices with Jenkins, SVN and Gitlab

Analyst

Jul 2020 - Oct 2021

Capgemini | India

- Maintained high availability microservices, ensuring 99% uptime.
- Streamlined SQL data pipelines, improving query performance by 10%. Used code review to enhance data integrity.
- Performed code review of microservice deployments, improving code quality and covering 99% code coverage with Junit tests utilizing junit4
- Contributed to release planning, feature rollouts, and defect resolution; leveraged code review best practices for efficient collaboration.

Projects

Lamprey Movement Detection Pipeline

Jan 2025 - Present

- Designed and implemented efficient data structures and algorithms for processing large video datasets within a Dockerized microservice.
- Created a PostgreSQL relational schema, transforming raw detection data into an analytical database optimized for querying.
- Deployed a scalable, event-driven architecture on GCP Cloud run, functions, achieving 99.9% uptime and processing 10Gb of Video data daily using robust error handling.
- GCP, SQL, Python, Data Warehousing, Software architecture, Data Science, Docker

NYU Taxi data analysis

Jan 2025 - Present

- Designed and implemented a Pipeline to Ingest 2GB of NYU taxi data using PySpark under dockerized workflow
- Delivering live Viz by flask api to the user with the ability to filter data on the go
- Single deployment point with database, data processing, modelling, cleaning and serving
- Spark, Hadoop, Big Data analysis, Docker

Election Data Analysis Platform

Aug 2024 - Dec 2024

- Developed a data model for U.S. election data, enabling efficient analysis and querying.
- Cleansed and analyzed election data using Python, Pandas, and NumPy, performing data transformations.
- Created data visualizations with Matplotlib and Seaborn to illustrate voting trends and demographic insights.
- Built a reproducible workflow, leveraging data modeling techniques, resulting in accurate insights and improved data quality.
- Numpy, Pandas, Data Visualization

Core Skills

, Java 8, 11, Python, SQL, Spring Boot, Azure Functions, REST API, SOAP API, Maven, JUnit, GIT, SVN,
Cloud Platforms : Azure (DevOps, ServiceBus), Google Cloud, Data Engineering : ETL pipelines, Data Warehousing, Pandas,
Numpy, Databases : Oracle 12c, PostgreSQL, Agile (Scrum), IBM WebSphere, Oracle WebLogic, SAS Enterprise Miner,
Market Basket Analysis, Docker Containers, Tableau,

Education

Central Michigan University

Aug 2024 - Dec 2025

Master of Science Computer Science

Relevant Coursework: Data Mining, Big Data Analytics, Data Engineering

GPA: 3.76

Lovely Professional University

Aug 2016 - May 2020

Bachelor of Technology Computer Science & Engineering

GPA: 8.02
