Work Experience

NTT DATA — Bengaluru, India

August 2022 – July 2024

Software Development Analyst

- Developed and maintained SOAP microservices for healthcare insurance providers, managing a high volume of daily requests across platforms like Azure cloud and Oracle WebLogic servers.
- Utilized technologies such as Java 8/11, Azure Functions, SOAP API, Oracle WebLogic, Spring Boot, Maven, and JUnit for efficient software delivery.
- Collaborated with cross-functional teams to troubleshoot and enhance system performance.

Capgemini — Mumbai, India

October 2021 – July 2022

Senior Analyst

- Led the development and maintenance of Java-based services using EJB design for automotive industry clients.
- Improved application performance and supported data analysis for enhanced vehicle configuration predictions.
- Worked with Java 8, JSF, EJB, SQL, and Agile methodologies.

Capgemini — Mumbai, India

July 2020 – October 2021

Analyst

- Developed features and maintained services for automotive clients, ensuring consistent performance and reliability.
- Managed SQL databases for better data insights and system optimizations.

Education

Central Michigan University — Mount Pleasant, MI, USA

August 2024 – December 2025

Master of Science in Computer Science

GPA – 3.76

Lovely Professional University — Punjab, India

August 2016 – May 2020

Bachelor of Technology in Computer Science & Engineering

CGPA – 8.02

Certifications

- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Azure Data Engineer Associate
- Microsoft Certified: Azure Developer Associate

Technical Skills

- Core Skills:** Core Java 8,11, Spring Boot (MVC, Spring Framework), Azure Functions, Azure Devops, SOAP API, REST API, SQL, Maven, JUnit, GIT, SVN, Object-Oriented Programming (OOP)
- Worked on:** JSF (JavaServer Faces), EJB (Enterprise JavaBeans), Angular 6, Python, Pandas, Numpy, Azure ServiceBus, Azure Datalake V2, SQL for data analysis, Oracle Database 12c, PostgresDB, Agile methodology, Oracle Weblogic, IBM Websphere, SAS Enterprise miner, Data Mining, Data Analytics, Market Basket analysis, Word, Excel, Powerpoint

Recent Projects

- EDA – US Elections** (Python, Data Analysis, Data Cleaning, Data Modelling) August 2024 – December 2024
I performed an Exploratory Data Analysis (EDA) on US elections using Python. The project utilized Pandas, Matplotlib, and Seaborn to analyze and visualize election data, uncovering trends and patterns to gain insights into voter demographics, turnout rates, and election results.
- Lamprey Detection** (Data Engineering, Data pipeline, Data Warehousing) January 2025 – May 2025
The Aim is to work in group of 3 to create an automated pipeline ingesting Video and excel files of a Lamprey fish movement detections in confined tank with ID tags and detection antenna. Transform the data and store it into relational database. Further investigate the data with sql, convert video data into detection data and make it usable for further analysis. We are using Google collab, google cloud and azure cloud for our storage and workbook requirements.
