Summary

Java Backend Software Engineer with 4.6+ years delivering enterprise applications across **healthcare payer integrations** and **automotive configuration products**, including services handling **50K+ daily requests at 99.99% SLA availability**.

Delivery scope: Converts business requirements into maintainable Java/Spring services, REST/SOAP integrations, relational-data workflows, automated tests, CI/CD release validation, and production support.

Engineering approach: Improves scalability, reliability, and performance through explicit failure handling, correlation telemetry, set-based query optimization, and root-cause analysis across application, database, messaging, and downstream boundaries.

Working style: Collaborates across engineering, QA, database, DevOps, deployment, vendor, and business-facing teams; documents reusable solutions, reviews code, mentors developers, and validates AI-assisted project changes through human review, builds, automated tests, and runtime checks before acceptance.

Technical Skills

Java Backend: Java 8/11, Spring Framework/MVC, Java EE/J2EE, REST/SOAP APIs, JAX-WS, SOA, Hibernate/HQL, JDBC/OJDBC, object-oriented design.

Data & Integration: SQL, Oracle, DB2; PostgreSQL (project/training); JMS, Azure Service Bus, Azure Relay, Azure Functions, IBM WebSphere, Oracle WebLogic, JSON, XML.

Delivery & Quality: Maven, Jenkins, GitLab CI/CD, IBM UrbanCode, Git/GitHub Actions, JUnit/JUnit4, SoapUI, Postman, Log4j2, Agile/Scrum, production troubleshooting and root-cause analysis.

Project Cloud, UI & AI: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC, Docker, Terraform; React/TypeScript, FastAPI; Codex, GitHub Copilot, Ollama, LangChain, RAG, Qdrant.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated service flows across **Azure Service Bus, Azure Relay, Azure Functions, and JMS**, synchronous REST dependencies, and Oracle/OJDBC processing with explicit timeout and partial-failure handling.
- **Led a project-wide Log4j2 migration**, owning the initial PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated an AOP-based monitoring library that propagated correlation IDs and captured latency, success/failure, and request-volume telemetry across services.
- Troubleshot production issues across Java services, WebSphere, messaging, databases, and downstream APIs; contributed code-path analysis, mitigation planning, rolling-restart validation, and release recommendations.
- Supported Maven/Jenkins/IBM UrbanCode delivery, JUnit/SoapUI testing, release documentation, post-deployment checks, and go/no-go or rollback recommendations with engineering, QA, deployment, and operations teams in an Agile SDLC.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a **Java EE/J2EE, JSF, Hibernate/HQL** application on Oracle WebLogic with DB2 and layered UI, service, DAO, and DTO components for Mercedes/Daimler Vans configuration workflows.
- Integrated an asynchronous Python prediction workflow with Java services and callbacks, then enforced deterministic option and package rules before recommendations reached dealer users.

- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10-20 seconds** through set-based HQL/DB2 processing while retaining authoritative business validation in Java.
- Diagnosed issues across Python output, Java logs, and DB2 reference data; supported Jenkins/GitLab CI/CD, JUnit4, Git-based code reviews, documentation, and junior-developer mentoring.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for a **digital-wallet application**, implementing authentication, balances, transactions, and profile workflows.

Selected Projects

Resume Corpus & Interactive Portfolio

resume-corpus | portfolio

- Directed and validated **Codex/GitHub Copilot-assisted development** of an evidence-ranked resume optimization system and React/TypeScript portfolio; reviewed generated changes and required validators, regression cases, build/parse checks, linting, GitHub Actions delivery, and runtime verification before acceptance.

CodingHelper — Local LLM Coding Platform

github.com/preferablehuman/-codinghelper

- Built a **LangChain/Ollama model gateway** in a Docker Compose application using React, FastAPI, PostgreSQL, Qdrant, and RAG; executed generated Java/Python solutions in an isolated runner with repair, rejection, and bounded-test promotion gates before reuse.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a privacy-oriented summarization and classification system with FastAPI, PyTorch, Hugging Face Transformers, T5, and PEFT/LoRA, plus Docker, MinIO, Prometheus, React, and TypeScript; evaluated the fine-tuned model with ROUGE metrics.

AWS Automated Spark Pipeline (Master's Coursework)

github.com/preferablehuman/AWS-automated-spark-pipeline

- Built an event-driven AWS pipeline where S3 triggers Lambda staging to EFS, an ECS-hosted Docker/Spark workload processes micro-batches, and results persist to RDS PostgreSQL; provisioned VPC/IAM and CloudWatch resources with **Terraform** for an **8GB+ dataset**.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
