Summary

Java Backend and Data Platform Engineer with 4.6+ years building and maintaining enterprise systems across **healthcare payer data integrations** and automotive configuration products, extended by hands-on AWS/Spark data-platform and React/TypeScript projects.

Delivery scope: Carries software through requirements, design, Java/API and data integration, functional and performance testing, documentation, release validation, and production support; builds event-driven pipelines that turn source data into queryable relational outputs.

Engineering approach: Protects reliability and data quality by defining business-rule boundaries, tracing messages and requests across services, instrumenting latency and failures, validating generated outputs, and designing for partial failure and restart recovery.

Working style: Connects application, data, infrastructure, and stakeholder perspectives; contributes code reviews, documents repeatable practices, mentors developers, and learns unfamiliar systems through structured debugging and evidence-driven decisions.

Technical Skills

Languages: Java 8/11; Core Java (Collections, Streams, Lambdas, Concurrency); Python; SQL; TypeScript/JavaScript (projects).

Backend, APIs & Data: Spring Boot, Spring Framework, REST/SOAP APIs, JAX-WS, Java EE/J2EE, Hibernate/HQL, JPA, JDBC/OJDBC; Spark/PySpark, Spark Structured Streaming, FastAPI.

Messaging & Event-Driven Systems: Azure Service Bus Topics, JMS queues, Azure Functions, Azure Relay; S3/Lambda events and streaming micro-batches; Kafka (hands-on/project).

Cloud & Infrastructure Projects: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC; Terraform, Docker, PostgreSQL, checkpoint-based restart recovery.

Databases: Oracle, DB2, PostgreSQL, SQL, HQL, JDBC; relational data integration, query tuning, schema validation, and service-layer data rules.

Testing, Quality & Operations: JUnit/JUnit4, Mockito, integration and API testing, SoapUI, Postman, performance analysis, Log4j2, observability, root-cause analysis; Jenkins, Maven, GitLab CI/CD, GitHub Actions, IBM UrbanCode.

Frontend Projects: React, TypeScript, Vite, Tailwind CSS; Angular/Spring MVC training applications.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare data services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated event-driven and request/response flows across **Azure Service Bus Topics, JMS queues, Azure Functions, and Azure Relay**, downstream REST services, and Oracle/OJDBC processing with explicit timeout and partial-failure handling.
- Integrated Oracle views and PL/SQL procedures through OJDBC while applying service-layer member/provider business rules to deliver reliable healthcare data to internal and external consumers.
- Worked within a healthcare-regulated data environment, consuming authenticated caller identity behind an enterprise API Gateway boundary and enforcing service-level authorization rules without claiming gateway ownership.
- **Led a project-wide Log4j2 migration**, owning the PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated AOP-based monitoring that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** across critical service paths.
- Supported JUnit/SoapUI validation, Jenkins/Maven/UrbanCode delivery, post-release smoke and business checks, production investigations, and go/no-go/rollback recommendations.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a Java EE/J2EE, JSF, Hibernate/HQL application on Oracle WebLogic and DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.
- Integrated a Python prediction workflow with Java services, then enforced deterministic option/package validation before machine-generated recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable option-code mapping into set-based HQL/DB2 CASE expressions while retaining business validation in Java.
- Diagnosed defects across Python outputs, Java validation logs, and DB2 reference data; contributed JUnit4 tests, Jenkins/GitLab CI/CD, code reviews, documentation, and production debugging.
- **Mentored junior developers** through codebase walkthroughs, incremental defects and features, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet applications, implementing authentication, CRUD, balances, transactions, and profile workflows.

Projects

AWS Automated Spark Pipeline

github.com/preferablehuman/AWS-automated-spark-pipeline

- Built an **event-driven AWS data pipeline**: S3 uploads trigger Lambda staging to EFS, Spark Structured Streaming processes micro-batches in an ECS-hosted Docker workload, and clean transformed data persists to RDS PostgreSQL over JDBC.
- Provisioned VPC, IAM, S3, Lambda, EFS, ECS, RDS, security groups, and CloudWatch with Terraform; processed an **8GB+ dataset** with explicit schemas and persisted checkpoints for restart recovery.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Python/FastAPI machine-learning service using PyTorch, Hugging Face Transformers, T5, and PEFT/LoRA; implemented diagnostics and repeatable offline evaluation to validate summarization and classification outputs.

Interactive Portfolio System

github.com/preferablehuman/portfolio

- Built and deployed a **React/TypeScript** SPA with searchable skill evidence, project case studies, persisted theming, custom routing, deep-link fallback, and GitHub Pages delivery.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
