Summary

Java Software Engineer with 4.6+ years building, enhancing, and maintaining customer-facing enterprise applications across **healthcare payer integrations** and **automotive configuration and recommendation products**.

Delivery scope: Carries changes across the full SDLC—requirements analysis, software design, Java/Spring implementation, REST/SOAP and data integration, testing, release validation, deployment support, and production operations.

Engineering approach: Builds high-performance, secure, and robust solutions by tracing application, database, messaging, and downstream behavior; applies automated tests, observability, deterministic validation, and performance analysis to protect customer outcomes.

Working style: Proactively translates problems into clear technical actions, articulates trade-offs, and collaborates with engineers, architects, analysts, QA, database, deployment, vendor, and business-facing teams; documents solutions, reviews code, and mentors developers.

Technical Skills

Programming: Java 8/11; Core Java (Collections, Streams, Lambdas, Concurrency); SQL; Python.

Software Engineering: Spring Boot, Spring Framework, Spring MVC, Java EE/J2EE, REST/SOAP APIs, JAX-WS, Hibernate/HQL, JPA, JDBC/OJDBC, OOP, Design Patterns, System Design, Performance Tuning.

AWS & Infrastructure Projects: AWS S3, Lambda, EFS, **ECS**, RDS, CloudWatch, IAM, VPC;

Terraform (IaC), Docker, PostgreSQL/JDBC, event-driven ingestion, restart checkpoints.

Enterprise Platforms & Integration: Azure Relay, Azure Service Bus, Azure Functions, JMS, IBM WebSphere, Oracle WebLogic, Oracle, DB2, PostgreSQL.

Delivery, Quality & Operations: Jenkins, Maven, IBM UrbanCode, GitLab CI/CD, GitHub Actions, Git, SVN; JUnit/JUnit4, Mockito, Integration Testing, Log4j2, SoapUI, Postman; Agile, production support, observability, root-cause analysis, release validation.

AI-Assisted Development: Project-based AI-assisted implementation and review with human validation of generated code, tests, documentation, and technical outputs.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Engineered and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare integration services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Delivered changes across requirements, implementation, JUnit/SoapUI testing, Jenkins/Maven/UrbanCode release workflows, and post-release smoke and business validation; contributed go/no-go/rollback recommendations.
- Integrated hybrid service flows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, downstream REST services, and Oracle/OJDBC processing with explicit timeout and partial-failure handling.
- **Led a project-wide Log4j2 migration**, owning the initial PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated AOP-based monitoring that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry**, improving visibility across critical service paths.
- Collaborated with engineers, architects, QA, database, deployment, vendor, and business-facing teams to analyze requirements, diagnose cross-platform defects, and coordinate safe application changes.
- Supported root-cause analysis of a **WebSphere memory/resource-retention incident**, contributing code-path review, mitigation strategy, and rolling-restart validation while maintaining operational stability.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed, enhanced, and supported a Java EE/J2EE, JSF, Hibernate/HQL application on Oracle WebLogic and DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.
- Integrated a Python vehicle-configuration prediction workflow with Java services, then enforced deterministic option/package validation before recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable option-code mapping into set-based HQL/DB2 CASE expressions while retaining business validation in Java.
- Diagnosed cross-system defects across Python output, Java validation logs, and DB2 reference data; supported Jenkins/GitLab CI/CD, JUnit4, code reviews, releases, and production maintenance.
- **Mentored junior developers** through codebase walkthroughs, incremental defects and features, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet applications, implementing authentication, email/OTP login, CRUD, balances, transactions, and profile workflows.

Projects

AWS Automated Spark Pipeline

github.com/preferablehuman/AWS-automated-spark-pipeline

- Designed and built an **event-driven AWS architecture**: S3 uploads trigger Lambda staging to EFS, an ECS-hosted Docker workload processes micro-batches, and results persist to RDS PostgreSQL over JDBC.
- Provisioned **VPC, IAM, S3, Lambda, EFS, ECS, RDS, security groups, and CloudWatch with Terraform**, processing an 8GB+ dataset with persisted checkpoints for restart recovery.

Interactive Portfolio System

github.com/preferablehuman/portfolio

- Built and deployed a React, TypeScript, Vite, and Tailwind CSS application with searchable skill evidence, project case studies, deep-link fallback, automated GitHub Pages delivery, and **AI-assisted development with human review** of implementation outputs.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Python/FastAPI email summarization and classification service with PyTorch, Hugging Face Transformers, T5, and PEFT/LoRA; implemented diagnostics and repeatable offline evaluation to validate model outputs instead of accepting generated results uncritically.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
