Summary

Java Backend Software Engineer with 4.6+ years building and maintaining enterprise services across healthcare and automotive systems, including integrations handling **50K+ daily requests at 99.99% SLA availability**.

Delivery scope: Carries Java/Spring service changes through requirements, REST/SOAP and messaging integration, database work, automated testing, CI/CD release validation, and third-level production support.

Engineering approach: Improves distributed-service performance, reliability, security-boundary compliance, and observability through explicit failure handling, correlation telemetry, query tuning, and cross-system root-cause analysis.

Working style: Works independently on contained initiatives and collaborates across global engineering, QA, database, deployment, vendor, and business-facing teams; documents solutions, reviews code, and mentors developers.

Technical Skills

Java Backend: Java 8/11, Spring Boot, Spring Framework/MVC, Java EE/J2EE, REST/SOAP APIs, JAX-WS, Microservices/SOA, Hibernate/HQL, JDBC/OJDBC.

Data & Messaging: SQL, Oracle, DB2; PostgreSQL (project/training); JMS, Azure Service Bus, Azure Relay, Azure Functions, IBM WebSphere, Oracle WebLogic.

CI/CD & Operations: Maven, Jenkins, GitLab CI/CD, GitHub Actions (project), IBM UrbanCode, Git; Linux familiarity, production support, incident investigation, root-cause analysis, Log4j2, correlation IDs, observability.

Testing & Delivery: JUnit/JUnit4, integration testing, SoapUI, Postman, Agile/Scrum, code reviews, release validation, technical documentation.

Cloud & Container Projects: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC; Docker, Terraform, Spark/PySpark; React, TypeScript, Vite, Tailwind CSS.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare integration services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated distributed service flows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, synchronous REST dependencies, and Oracle/OJDBC processing with explicit timeout and partial-failure handling.
- Provided third-level production support by tracing incidents across Java services, WebSphere, messaging, database, and downstream boundaries; coordinated mitigation and validation with specialist teams and vendors.
- **Led a project-wide Log4j2 migration**, owning the PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated an AOP-based monitoring library that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** across services.
- Supported a WebSphere memory/resource-retention investigation through code-path review, mitigation planning, and rolling-restart validation while maintaining service availability.
- Supported Maven/Jenkins/IBM UrbanCode delivery, JUnit/SoapUI testing, release documentation, smoke and business checks, and go/no-go or rollback recommendations within security-controlled production processes.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a **Java EE/J2EE, JSF, Hibernate/HQL** enterprise application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.
- Integrated a Python vehicle-configuration prediction workflow with Java services, then enforced deterministic option and package validation before recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable option-code mapping into set-based HQL/DB2 expressions while retaining business validation in Java.
- Diagnosed cross-system incidents across Python output, Java validation logs, and DB2 reference data; used Postman and production logs for verification and supported Jenkins/GitLab CI/CD, JUnit4, and code reviews.
- **Mentored junior developers** through codebase walkthroughs, incremental defects and features, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and **PostgreSQL** modules for fitness-club and digital-wallet applications, implementing authentication, email/OTP login, CRUD, balances, transactions, and profile workflows.

Selected Projects

AWS Automated Spark Pipeline

github.com/preferablehuman/AWS-automated-spark-pipeline

- Built a cloud-native, event-driven AWS pipeline using **S3, Lambda, EFS, an ECS-hosted Docker workload, and RDS PostgreSQL/JDBC**; provisioned network, IAM, security-group, and CloudWatch resources with Terraform for an **8GB+ dataset**.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Dockerized AI application with a **Python/FastAPI model service and React/TypeScript client**, implementing T5/PEFT-LoRA summarization, categorization, adapter lifecycle, diagnostics, and Prometheus metrics.

Interactive Portfolio System

github.com/preferablehuman/portfolio

- Built and deployed a React, TypeScript, Vite, and Tailwind CSS SPA with searchable skill evidence, deep-link fallback, and automated **GitHub Actions** delivery.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
