Summary

Java Backend / Software Engineer II with 4.6+ years developing enterprise healthcare and automotive applications, including services handling **50K+ daily requests at 99.99% SLA availability**.

Delivery scope: Carries Java/Spring application changes from requirements and design through REST/SOAP services, Hibernate/SQL persistence, automated testing, CI/CD release validation, documentation, and production maintenance.

Engineering approach: Applies OOP and design-pattern fundamentals while improving maintainability, performance, reliability, and observability through explicit failure handling, query tuning, and cross-system analysis.

Working style: Learns unfamiliar systems quickly, communicates technical trade-offs, and collaborates across engineering, QA, database, deployment, vendor, and business-facing teams; reviews code and mentors developers.

Technical Skills

Java Application Development: Java 8/11, OOP, design patterns, Spring Boot, Spring Framework/MVC, Java EE/J2EE, REST/SOAP APIs, JAX-WS, Microservices/SOA, Hibernate/HQL, JDBC/OJDBC.

Databases: SQL, Oracle, DB2; PostgreSQL (project/training); relational database concepts, SQL/HQL query optimization, database integration.

Cloud & Architecture: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC; Docker and Terraform (projects); Azure Service Bus, Azure Relay, Azure Functions, JMS.

Engineering Delivery: Git, JIRA, Maven, Jenkins, GitLab CI/CD, IBM UrbanCode; JUnit/JUnit4, integration testing, SoapUI, Postman; Agile/Scrum, code reviews, technical documentation.

UI & Security Context: JSF/AJAX; Angular (training); React/TypeScript (projects); XML/JSON, HTML/CSS; enterprise API Gateway security boundaries and service-level authorization.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, Spring Boot/Spring Framework, JAX-WS, and REST/SOAP** healthcare services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated service flows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, synchronous REST dependencies, XML/JSON processing, and Oracle/OJDBC with explicit timeout and partial-failure handling.
- Integrated Java services with Oracle through OJDBC, consuming established views and PL/SQL procedures while applying service-layer member and provider business rules.
- **Led a project-wide Log4j2 migration**, owning the initial PoC, preserving production logging contracts, documenting a repeatable path, and reviewing the team rollout.
- Integrated an AOP-based monitoring library that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** across services.
- Validated services with JUnit and SoapUI; supported Maven/Jenkins/IBM UrbanCode releases, post-deployment smoke and business checks, and go/no-go or rollback recommendations.
- Worked behind an enterprise API Gateway security boundary, consumed authenticated caller identity, and applied team-owned service-level authorization rules.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and maintained a **Java EE/J2EE, EJB, JSF/AJAX, Hibernate/HQL** enterprise web application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration and ordering workflows.

Capgemini (continued), Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Integrated an asynchronous Python prediction workflow with Java services, then enforced deterministic option and package validation before recommendations reached dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** through set-based HQL/DB2 expressions while retaining business validation in Java.
- Diagnosed defects across Python output, Java logs, and DB2 data; contributed JUnit4 testing, Postman validation, Jenkins/GitLab CI/CD, code reviews, documentation, and production debugging.
- **Mentored junior developers** through codebase and business-flow walkthroughs, contained features and defects, testing, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet applications, implementing authentication, CRUD, balances, transactions, and profile workflows.

Selected Projects

AWS Automated Spark Pipeline

github.com/preferablehuman/AWS-automated-spark-pipeline

- Built an event-driven AWS pipeline using **S3, Lambda, EFS, an ECS-hosted Docker workload, and RDS PostgreSQL/JDBC**; provisioned VPC, IAM, security groups, CloudWatch, and related infrastructure with Terraform for an **8GB+ dataset**.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Dockerized application with a **Python/FastAPI service and React/TypeScript client**, MinIO storage, Prometheus diagnostics, and separated application-facing and model workflows.

Interactive Portfolio System

github.com/preferablehuman/portfolio

- Built and deployed a React, TypeScript, Vite, and Tailwind CSS SPA with searchable skill evidence, responsive navigation, deep-link fallback, and automated GitHub Actions delivery.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
