Summary

Java Backend / Application Developer with 4.6+ years building and modernizing enterprise systems across **healthcare payer integrations** and **automotive configuration and recommendation products**.

Delivery scope: Takes application changes from requirement analysis through Java/Spring implementation, REST/SOAP and SQL/Hibernate integration, testing, CI/CD release validation, and production support.

Engineering approach: Improves performance, reliability, and observability by tracing behavior across application, database, messaging, and downstream boundaries while preserving authoritative business rules.

Working style: Collaborates with engineering, QA, database, deployment, vendor, and client-facing teams; communicates trade-offs, documents repeatable solutions, reviews code, and mentors developers.

Technical Skills

Languages: Java 8/11, SQL, Python; TypeScript (project).

Backend/Integration: Spring Framework, Spring MVC, REST/SOAP APIs, JAX-WS, Java EE/J2EE, EJB, JSF, Hibernate/HQL, JDBC/OJDBC, SOA, JMS, Azure Service Bus, Azure Relay, Azure Functions, IBM WebSphere, Oracle WebLogic.

Cloud/Data Projects: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC; Terraform, Docker, Spark/PySpark, Spark Structured Streaming, PostgreSQL/JDBC.

DevOps/Quality: Jenkins, Maven, IBM UrbanCode, GitLab CI/CD, GitHub Actions, Git; JUnit/JUnit4, Integration Testing, Log4j2, SoapUI, Postman.

Engineering/Domain: Agile/Scrum, Production Support, Performance Tuning, Root-Cause Analysis, Observability, CAQH v2/v4, Healthcare Payer Integration; React, TypeScript, Vite, Tailwind CSS (projects).

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** CAQH healthcare payer integration services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated hybrid SOA service flows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, plus synchronous downstream REST calls and Oracle/OJDBC processing, with explicit timeout and partial-failure handling.
- Integrated Java services with **Oracle through OJDBC**, consuming established views and PL/SQL procedures while applying service-layer member/provider business rules.
- **Led a project-wide Log4j2 migration**, owning the initial PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated an AOP-based service-monitoring library that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** across services.
- Coordinated with engineering, QA, database, deployment, vendor, and business-facing teams to clarify changes and release risks; supported Jenkins/Maven/IBM UrbanCode workflows, JUnit/SoapUI validation, post-release checks, and go/no-go/rollback recommendations.
- Supported root-cause analysis of a **WebSphere memory/resource-retention incident**, contributing code-path review, mitigation strategy, and rolling-restart validation while maintaining service availability.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a Java EE/J2EE, JSF, Hibernate/HQL enterprise application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.
- Integrated a Python vehicle-configuration prediction workflow with Java services, then enforced deterministic option/package validation before recommendations were exposed to dealer users.

- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable option-code mapping from Java into set-based HQL/DB2 CASE expressions while retaining business validation in Java.
- Diagnosed cross-system issues across Python output, Java validation logs, and DB2 reference data; used Postman and production logs to verify performance and supported Jenkins/GitLab CI/CD, Git-based code reviews, JUnit4, and production debugging.
- **Mentored junior developers** through codebase walkthroughs, incremental defects and features, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet applications, implementing authentication, email/OTP login, CRUD, account balances, transactions, and profile workflows.

Projects

AWS Automated Spark Pipeline / NYU Taxi Platform

github.com/preferablehuman/AWS-automated-spark-pipeline

- Built an **event-driven AWS data pipeline** where S3 uploads trigger Lambda staging to EFS, a Docker-packaged Spark/PySpark Structured Streaming workload processes micro-batches on ECS, and transformed data persists to RDS PostgreSQL over JDBC.
- Provisioned VPC/subnets/NAT, IAM, S3 notifications, Lambda, EFS, ECS, RDS, security groups, and CloudWatch resources with Terraform; processed an **8GB+ taxi dataset** and persisted EFS checkpoints for restart recovery.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a privacy-oriented email summarization and classification system with a **FastAPI model service**, **PyTorch**, **Hugging Face Transformers**, **T5**, and **PEFT/LoRA**, plus Docker, MinIO, Prometheus, React, and TypeScript.
- Implemented model summarization, categorization, adapter lifecycle, and diagnostics workflows; evaluated the fine-tuned model at **ROUGE-1 F 53.04**, **ROUGE-2 F 44.90**, and **ROUGE-L F 45.90**.

Interactive Portfolio System

github.com/preferablehuman/portfolio

- Built and deployed a recruiter-facing React, Vite, TypeScript, and Tailwind CSS SPA with project case studies, searchable skill evidence, persisted theming, deep-link fallback, and automated GitHub Actions/GitHub Pages delivery.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
