Summary

Java Backend / Application Developer with 4.6+ years building and modernizing scalable enterprise systems across **healthcare payer integrations** and **automotive configuration and recommendation products**.

Delivery scope: Takes application changes from requirements through Java/Spring implementation, REST/SOAP and SQL/Hibernate integration, unit/integration testing, CI/CD release validation, and production support.

Engineering approach: Improves performance, reliability, and observability by tracing behavior across application, DB2/Oracle data access, messaging, and downstream boundaries while preserving authoritative business rules.

Working style: Collaborates with engineering, QA, database, deployment, vendor, and client-facing teams; communicates trade-offs, documents repeatable solutions, reviews code, and mentors developers.

Technical Skills

Java & APIs: Java 8/11, Core Java, Spring Boot, Spring Framework/MVC, Spring Security (knowledge), Java EE/J2EE, EJB, JSF, REST/SOAP APIs, JAX-WS, Hibernate/JPA, JDBC/OJDBC.

Data & Messaging: **IBM DB2, HQL/SQL query optimization**, Oracle, PostgreSQL; SOA, JMS, Azure Service Bus/Relay/Functions, **Apache Kafka (hands-on project)**.

Cloud, Platforms & Monitoring: AWS, Azure, Docker, Kubernetes (knowledge), Terraform; IBM WebSphere, Oracle WebLogic; Log4j2, Prometheus (project), correlation-ID observability.

Quality & Delivery: JUnit/JUnit4, Mockito, Integration Testing, SoapUI, Postman, Code Reviews, Production Debugging, Root-Cause Analysis, Performance Tuning; Jenkins, Maven, IBM UrbanCode, GitLab CI/CD, Git, SVN.

Ways of Working: Agile/Scrum, Jira, Confluence, Technical Documentation, Mentoring, Cross-functional and client-facing collaboration; Python.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed, tested, and maintained **Java 8/11, JAX-WS/Spring Framework, and REST/SOAP** healthcare payer applications in a client-governed regulated-data environment, supporting **50K+ daily requests at 99.99% SLA availability**.
- **Led a project-wide Log4j2 upgrade**, building the PoC, preserving production logging contracts, documenting a repeatable migration path, and reviewing the team rollout.
- Troubleshoot production failures across Java services, Oracle/OJDBC processing, and downstream integrations using logs, correlation IDs, JUnit/SoapUI validation, and root-cause analysis.
- Integrated hybrid message- and service-driven flows across **Azure Relay, Azure Service Bus, Azure Functions, JMS, and REST**, with explicit timeout and partial-failure handling for scalable enterprise processing.
- Integrated an AOP-based monitoring library that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** across services.
- Investigated an Edifecs upgrade by tracing requests through Java services and vendor JARs, analyzing dependencies, isolating compatibility failures, and documenting the implementation roadmap.
- Collaborated with testing, deployment, database, vendor, and client-facing teams through Agile delivery; supported Jenkins/Maven/UrbanCode releases, smoke checks, and go/no-go/rollback recommendations.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed, tested, and supported a Java EE/J2EE, JSF, Hibernate/HQL application on Oracle WebLogic with **IBM DB2** for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.

- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable mapping into set-based **HQL/DB2 CASE query processing** while retaining business validation in Java.
- Integrated a Python prediction workflow with Java services and enforced deterministic option/package validation before recommendations reached dealer users.
- Debugged cross-system defects across Python output, Java validation logs, and DB2 data; supported Jenkins/GitLab CI/CD, JUnit4 testing, code reviews, and production fixes.
- **Mentored junior developers** through codebase walkthroughs, incremental features and defects, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet applications, implementing authentication, CRUD, balances, transactions, and profile workflows.

Projects

AWS Automated Spark Pipeline / NYU Taxi Platform

GitHub

- Built an event-driven AWS pipeline using S3, Lambda, EFS, Spark Structured Streaming in an ECS-hosted container, and RDS PostgreSQL; provisioned infrastructure with Terraform and processed an **8GB+ dataset**.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Dockerized email summarization and classification system with FastAPI, PyTorch, Hugging Face Transformers, T5, PEFT/LoRA, MinIO, Prometheus, React, and TypeScript; evaluated the model at **ROUGE-1 F 53.04**.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
