Summary

Java Backend / Integration Developer with 4.6+ years building and modernizing enterprise systems across **healthcare payer integrations** and **automotive configuration and recommendation products**.

Delivery scope: Takes Java/Spring integration changes from requirements through REST/SOAP, messaging, database implementation, unit/integration testing, CI/CD release validation, and production support.

Engineering approach: Builds reliable service flows across APIs, JMS/cloud messaging, Oracle/DB2, and vendor boundaries; improves performance and observability through failure handling, query redesign, structured logging, and correlation telemetry.

Working style: Collaborates with business-facing, engineering, QA, database, vendor, and deployment teams to understand end-to-end flows; communicates trade-offs, documents repeatable solutions, reviews code, and mentors developers.

Technical Skills

Java Backend: Java SE/EE 8/11, Core Java, Spring Boot, Spring Framework/MVC, Dependency Injection, REST/SOAP APIs, JAX-WS, EJB, JSF, Hibernate/HQL, JPA, JDBC/OJDBC, SQL.

Enterprise Integration: SOA, JMS, Azure Service Bus/Relay/Functions, synchronous REST dependencies, XML/JSON processing, Oracle and DB2 integration; Edifecs upgrade analysis, CAQH v2/v4 healthcare data exchange.

AWS/Cloud Projects: AWS S3, Lambda, EFS, ECS, RDS, CloudWatch, IAM, VPC; Docker, Terraform, serverless event triggers, Spark Structured Streaming, PostgreSQL; Azure.

Quality, CI/CD & Monitoring: JUnit/JUnit4, Mockito, Integration Testing, SoapUI, Postman, Code Reviews; Jenkins, Maven, IBM UrbanCode, GitLab CI/CD, GitHub Actions, Git, SVN; Log4j2, correlation IDs, Root-Cause Analysis, Performance Tuning.

Engineering Practices: Agile/Scrum, Design Patterns, error/timeout/partial-failure handling, production support, proactive service telemetry, technical documentation, mentoring, stakeholder collaboration.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare integration services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated hybrid service flows across **Azure Service Bus, Azure Relay, Azure Functions, JMS, and REST**, with Oracle/OJDBC processing and explicit timeout and partial-failure handling across downstream systems.
- Investigated an **Edifecs integration upgrade** by tracing end-to-end requests through internal and vendor JARs, analyzing dependencies, isolating compatibility failures, and documenting required implementation changes.
- Integrated an AOP-based monitoring library that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** across services for proactive operational visibility.
- **Led a project-wide Log4j2 migration**, building the PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Troubleshoot production issues across Java services, Oracle processing, JSON/XML service flows, and downstream integrations using logs, correlation IDs, JUnit/SoapUI validation, and root-cause analysis.
- Collaborated with testing, deployment, database, vendor, and client-facing teams through Agile delivery; supported Jenkins/Maven/UrbanCode releases, smoke checks, and go/no-go/rollback recommendations.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a Java EE/J2EE, JSF, Hibernate/HQL application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.

- **Reduced VIN API latency from 60+ seconds to 10–20 seconds** by moving stable mappings into set-based HQL/DB2 CASE processing while retaining authoritative business validation in Java.
- Integrated a Python prediction workflow with Java services and enforced deterministic option/package validation before recommendations reached dealer users.
- Debugged cross-system failures across Python output, Java validation logs, and DB2 reference data; supported Jenkins/GitLab CI/CD, JUnit4 testing, code reviews, and production fixes.
- **Mentored junior developers** through codebase and business-flow walkthroughs, incremental features and defects, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet applications, implementing authentication, CRUD, transactions, and profile workflows.

Projects

AWS Automated Spark Pipeline / NYU Taxi Platform

GitHub

- Built an **event-driven AWS pipeline** where S3 uploads trigger Lambda staging to EFS, Spark Structured Streaming processes files in an ECS-hosted Docker container, and results persist to RDS PostgreSQL over JDBC.
- Provisioned VPC/subnets/NAT, IAM, S3 notifications, Lambda, EFS, ECS, RDS, security groups, and CloudWatch resources with Terraform; processed an **8GB+ dataset** with EFS checkpoints for restart recovery.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Dockerized FastAPI model service using Python, PyTorch, and Hugging Face Transformers, with MinIO, Prometheus, React, and TypeScript.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
