Summary

Java Backend Developer with full-stack project breadth and 4.6+ years delivering enterprise applications across **healthcare payer integrations** and **automotive configuration and recommendation products**.

Delivery scope: Builds Java/Spring APIs and database-backed workflows from requirements through implementation, testing, CI/CD validation, and production support; extends this foundation through **React/TypeScript web applications** and an **LLM-powered graduate capstone**.

Engineering approach: Applies OOP, design patterns, clean service boundaries, deterministic business validation, and evidence-led performance tuning to build maintainable systems and trace behavior across UI, API, database, messaging, and downstream integrations.

Working style: Collaborates across engineering, QA, database, deployment, vendor, and client-facing teams; communicates trade-offs, documents repeatable solutions, reviews code, and mentors developers.

Technical Skills

Java/Backend: Java 8/11, Core Java, Spring Boot, Spring Framework/MVC, Java EE/J2EE, REST/SOAP APIs, JAX-WS, Hibernate/HQL, JPA, JDBC/OJDBC, OOP, Design Patterns.

Frontend Project Technologies: React, TypeScript, HTML/CSS, Vite, Tailwind CSS, Motion; Angular (training).

AI/LLM Project Technologies: Python, FastAPI, PyTorch, Hugging Face Transformers, T5, PEFT/LoRA, Docker, MinIO, Prometheus.

Data/Cloud/Integration: SQL, Oracle, DB2, PostgreSQL; AWS (S3, Lambda, EFS, ECS, RDS), Azure Service Bus/Relay/Functions, JMS, Terraform, IBM WebSphere, Oracle WebLogic.

Delivery/Quality: GitHub, GitHub Actions, Jenkins, Maven, GitLab CI/CD, IBM UrbanCode, Git; JUnit/JUnit4, Mockito, Integration Testing, SoapUI, Postman, Log4j2, Agile/Scrum.

Selected Projects

Interactive Portfolio System

github.com/preferablehuman/portfolio

- Designed, built, and deployed a recruiter-facing **React, TypeScript, HTML/CSS, Vite, and Tailwind CSS** single-page application with searchable skill evidence, project case studies, persisted theming, responsive navigation, and deep-link fallback.
- Automated quality checks and GitHub Pages deployment through **GitHub Actions**, keeping build, test, and release steps reproducible.

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built an LLM-powered email summarization and classification system with a **React/TypeScript client and FastAPI model service**, using PyTorch, Hugging Face Transformers, T5, PEFT/LoRA, Docker, MinIO, and Prometheus.
- Implemented summarization, categorization, adapter lifecycle, and diagnostic workflows; evaluated the fine-tuned model at **ROUGE-1 F 53.04, ROUGE-2 F 44.90, and ROUGE-L F 45.90**.

AWS Automated Spark Pipeline

github.com/preferablehuman/AWS-automated-spark-pipeline

- Provisioned a cloud-ready, event-driven pipeline with Terraform: S3 uploads trigger Lambda staging to EFS, Spark processes an **8GB+ dataset** in an ECS-hosted Docker container, and results persist to RDS PostgreSQL over JDBC.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP** healthcare integration services on IBM WebSphere, supporting **50K+ daily requests at 99.99% SLA availability**.

- Integrated hybrid service flows across **Azure Relay, Azure Service Bus, Azure Functions, and JMS**, synchronous downstream REST calls, and Oracle/OJDBC processing with explicit timeout and partial-failure handling.
- Integrated Java services with **Oracle through OJDBC**, consuming established views and PL/SQL procedures while applying service-layer member and provider business rules.
- **Led a project-wide Log4j2 migration**, owning the initial PoC, preserving production logging contracts, documenting a repeatable upgrade path, and reviewing the team rollout.
- Integrated an AOP-based monitoring library that propagated correlation IDs and captured **latency, success/failure, and request-volume telemetry** across services.
- Supported Jenkins/Maven/IBM UrbanCode workflows, JUnit/SoapUI validation, post-release smoke and business checks, production incident analysis, and go/no-go or rollback recommendations.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a Java EE/J2EE, JSF, Hibernate/HQL enterprise application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration, recommendation, and ordering workflows.
- Integrated a Python vehicle-configuration prediction workflow with Java services, then enforced deterministic option and package validation before recommendations were exposed to dealer users.
- **Reduced VIN repeat-configuration API latency from 60+ seconds to 10–20 seconds** by moving stable option-code mapping from Java into set-based HQL/DB2 CASE expressions while retaining business validation in Java.
- Diagnosed cross-system issues across Python output, Java validation logs, and DB2 reference data; supported Jenkins/GitLab CI/CD, JUnit4, code reviews, and production debugging.
- **Mentored junior developers** through codebase walkthroughs, incremental defects and features, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet applications, implementing authentication, email/OTP login, CRUD, account balances, transactions, and profile workflows.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
