Summary

Java Backend / API Developer with 4.6+ years building and modernizing enterprise integration systems across **healthcare payer** and **automotive configuration and recommendation products**.

Delivery scope: Takes API and integration changes from requirements through Java/Spring implementation, REST/SOAP and SQL/Hibernate integration, unit/integration testing, CI/CD release validation, and production support.

Engineering approach: Improves latency, reliability, error handling, and observability by tracing behavior across application, database, messaging, and downstream boundaries; extends Java experience with Python/FastAPI and AI-system project work.

Working style: Collaborates with technical leads, engineering, QA, database, deployment, vendor, and client-facing teams; communicates trade-offs, reviews code, documents repeatable solutions, and mentors developers.

Technical Skills

Java, Spring & APIs: Java 8/11, Core Java, Spring Boot, Spring Framework/MVC, REST/SOAP APIs, JAX-WS, Java EE/J2EE, Hibernate/HQL, JPA, JDBC/OJDBC; Spring Security and OAuth2/JWT (knowledge).

Python & AI Projects: Python, FastAPI, PyTorch, Hugging Face Transformers, T5, PEFT/LoRA, Prometheus; React, TypeScript.

Messaging, Cloud & Data: JMS, Azure Service Bus/Relay/Functions, Kafka (hands-on project); Azure, AWS, Docker, Terraform, Kubernetes (knowledge); Oracle, DB2, PostgreSQL, SQL query optimization.

Quality & Delivery: JUnit/JUnit4, Mockito, Integration Testing, SoapUI, Postman, Code Reviews, Log4j2, Root-Cause Analysis, Performance Tuning; Jenkins, Maven, IBM UrbanCode, GitLab CI/CD, GitHub Actions, Git, SVN.

Engineering Practices: Agile/Scrum, API integration, error and partial-failure handling, correlation-ID observability, production support, technical documentation, mentoring, cross-functional collaboration.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Developed, tested, and maintained **Java 8/11, JAX-WS/Spring, and REST/SOAP APIs** on IBM WebSphere for healthcare payer integrations, supporting **50K+ daily requests at 99.99% SLA availability**.
- Integrated hybrid message- and service-driven flows across **Azure Service Bus, Azure Relay, Azure Functions, JMS, and REST**, with explicit timeout and partial-failure handling across downstream boundaries.
- Integrated an AOP-based monitoring library that propagated correlation IDs and captured **API latency, success/failure, and request-volume telemetry** across services.
- Troubleshoot production failures across Java services, Oracle/OJDBC processing, and downstream integrations using logs, correlation IDs, JUnit/SoapUI validation, and root-cause analysis.
- **Led a project-wide Log4j2 migration**, building the PoC, preserving production logging contracts, documenting a repeatable implementation path, and reviewing the team rollout.
- Collaborated with technical leads, testing, deployment, database, vendor, and client-facing teams; supported Jenkins/Maven/UrbanCode releases, smoke checks, and go/no-go/rollback recommendations.

Capgemini, Mumbai, India

Senior Analyst, Jul 2020 - Aug 2022

- Developed and supported a Java EE/J2EE, JSF, Hibernate/HQL application on Oracle WebLogic with DB2 for Mercedes/Daimler Vans configuration and recommendation workflows.
- **Reduced VIN API latency from 60+ seconds to 10–20 seconds** by moving stable mappings into set-based HQL/DB2 CASE processing while retaining authoritative business validation in Java.

- Integrated a Python vehicle-configuration prediction workflow with Java services and enforced deterministic option/package validation before recommendations reached dealer users.
- Debugged cross-system defects across Python output, Java validation logs, and DB2 data; supported Jenkins/GitLab CI/CD, JUnit4 testing, code reviews, and production fixes.
- **Mentored junior developers** through Java codebase walkthroughs, incremental features and defects, debugging support, and code reviews.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring/Spring MVC, Angular, and PostgreSQL modules for fitness-club and digital-wallet applications, implementing authentication, CRUD, transactions, and profile workflows.

Projects

Privacy-Preserving AI Email Client (Graduate Capstone)

- Built a Dockerized **FastAPI model service** for email summarization and classification using Python, PyTorch, Hugging Face Transformers, T5, and PEFT/LoRA, with MinIO, Prometheus, React, and TypeScript.
- Implemented summarization, categorization, adapter lifecycle, and diagnostic workflows; evaluated the model at **ROUGE-1 F 53.04, ROUGE-2 F 44.90, and ROUGE-L F 45.90**.

AWS Automated Spark Pipeline / NYU Taxi Platform

GitHub

- Built an **event-driven AWS pipeline** using S3, Lambda, EFS, Spark Structured Streaming in an ECS-hosted Docker container, and RDS PostgreSQL; provisioned infrastructure with Terraform and processed an **8GB+ dataset**.

Education

Central Michigan University, Mount Pleasant, MI, USA

Aug 2024 - Dec 2025

Master of Science in Computer Science, GPA: 3.87/4.0

Lovely Professional University, Punjab, India

Aug 2016 - May 2020

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.02/10

Certifications

Microsoft Certified: Azure Fundamentals | **Azure Developer Associate** | Azure Data Engineer Associate
